

MICROSOFT 365 MANAGEMENT

Make More of the Platform You Already Have.

Microsoft 365 is central to how organizations communicate, collaborate, manage identity, and access information. Intrinsic brings administration, security, governance, licensing, and user support together in one managed service.

MANAGEMENT ACROSS MICROSOFT 365

One platform. Multiple responsibilities.

Coordinated management keeps the platform productive and its access, information, and security controls aligned.

01

Administration & Licensing

Tenant configuration, user management, licensing, and platform changes.

02

Identity & Access

Microsoft Entra ID, authentication, permissions, access policies, and user lifecycle.

03

Exchange Online

Email administration, security, mail flow, configuration, and retention.

04

Teams & Collaboration

Teams administration, external access, collaboration controls, and governance.

05

SharePoint & Information

Sites, permissions, sharing, document management, and information structure.

06

Security & Governance

Security policies, data protection, access controls, retention, and oversight.

ACCESS, INFORMATION & CONTROL

Oversight as your organization changes.

Users change. Permissions accumulate. Information moves through Teams and SharePoint. Applications connect to Microsoft identities, and the platform continually adds new features and controls.

Intrinsic keeps identity, access, information, and security appropriately managed over time.

ONGOING PLATFORM MANAGEMENT

A platform that continues to evolve.

Microsoft 365 requires continuous administration as organizational needs change. Intrinsic manages configuration, security, licensing, access, and platform changes, addresses issues, and identifies opportunities to make better use of the platform.

CONNECTED TO YOUR TECHNOLOGY ENVIRONMENT

Part of a larger, more secure environment.

Microsoft 365 connects to endpoints, cybersecurity, cloud services, applications, and user support. Intrinsic coordinates the platform with the technology and security operations around it.

A more connected
and resilient
organization.

MICROSOFT 365, MANAGED AROUND YOUR ORGANIZATION

Ongoing administration. Stronger control. Greater productivity.
